Profile

Intern SAP consultant and fourth-year Bachelor of Computing student with four SAP certifications. Experience spans SAP migration development, MCP prototyping, SAPUI5 and Cloud Integration training projects.

Experience

Intern SAP Consultant | EPI-USE Africa | January 2026 - Present

SAP HCM to SuccessFactors Employee Central | Internal migration project

- Implemented employee identity mapping and contributed organisational-object mapping using SAP Connector Framework, including migration-run configuration and versioned mapping results.
- Extended employee payment-information processing and verified core and payment record creation for one employee in the SuccessFactors test system.

SAP-AI Integration Prototype | Model Context Protocol

- Worked on an MCP prototype to connect Claude Desktop with a custom SAP endpoint, exploring AI-assisted interaction with an SAP system.

SAPUI5 Application Development | Training project

- Developed a customer-and-orders practice application using Northwind OData, with data binding, navigation and interface styling.

Employee Data Integration | SAP Cloud Integration training project

- Developed an integration flow for employee-data extraction, enrichment and transformation, using SuccessFactors data, message mapping and Groovy scripting.

SAP Enhancement Analysis | Internal ABAP development

- Developed a read-only enhancement inventory and rule-based migration-assessment tool; validated sandbox output with 31 passing automated tests.

SAP Certifications

SAP Certified - SAP Fiori Application Developer | 9 April 2026

SAP Certified - Integration Developer | 1 July 2026

SAP Certified - Backend Developer - SAP Cloud Application Programming Model
17 August 2026

SAP Certified - Back-End Developer - ABAP Cloud | 21 October 2026
